

OCTOBER KINDEGARTEN LESSON

PB&J Hooray Read Aloud

Show the video of the read aloud of the book, PB&J Hooray!, to your class.

<https://www.youtube.com/watch?v=aayWcF-W7s4&t=74s>

Follow-up Questions

- Where does peanut butter come from? Peanuts that grow underground in fields.
- Where does jelly come from? Grapes that grow on vines.
- Where does bread come from? Wheat that is grown in large fields.
- Which of these crops is a major crop in Kansas? Wheat! Kansas is known as the Breadbasket of the World because we grow more wheat than any other state in the United States!

Worksheet: How Did My Sandwich Get to Me?

Have students complete the worksheet by numbering in order the journey of bread from the field to our tables.

Note: Students may switch their 1s and 2s: If they see the picture of the wheat kernels as the seeds being planted, they will place it as 1. If they view the kernels as the result of the harvest, they will have it as 2. Either way works!

Taste Test

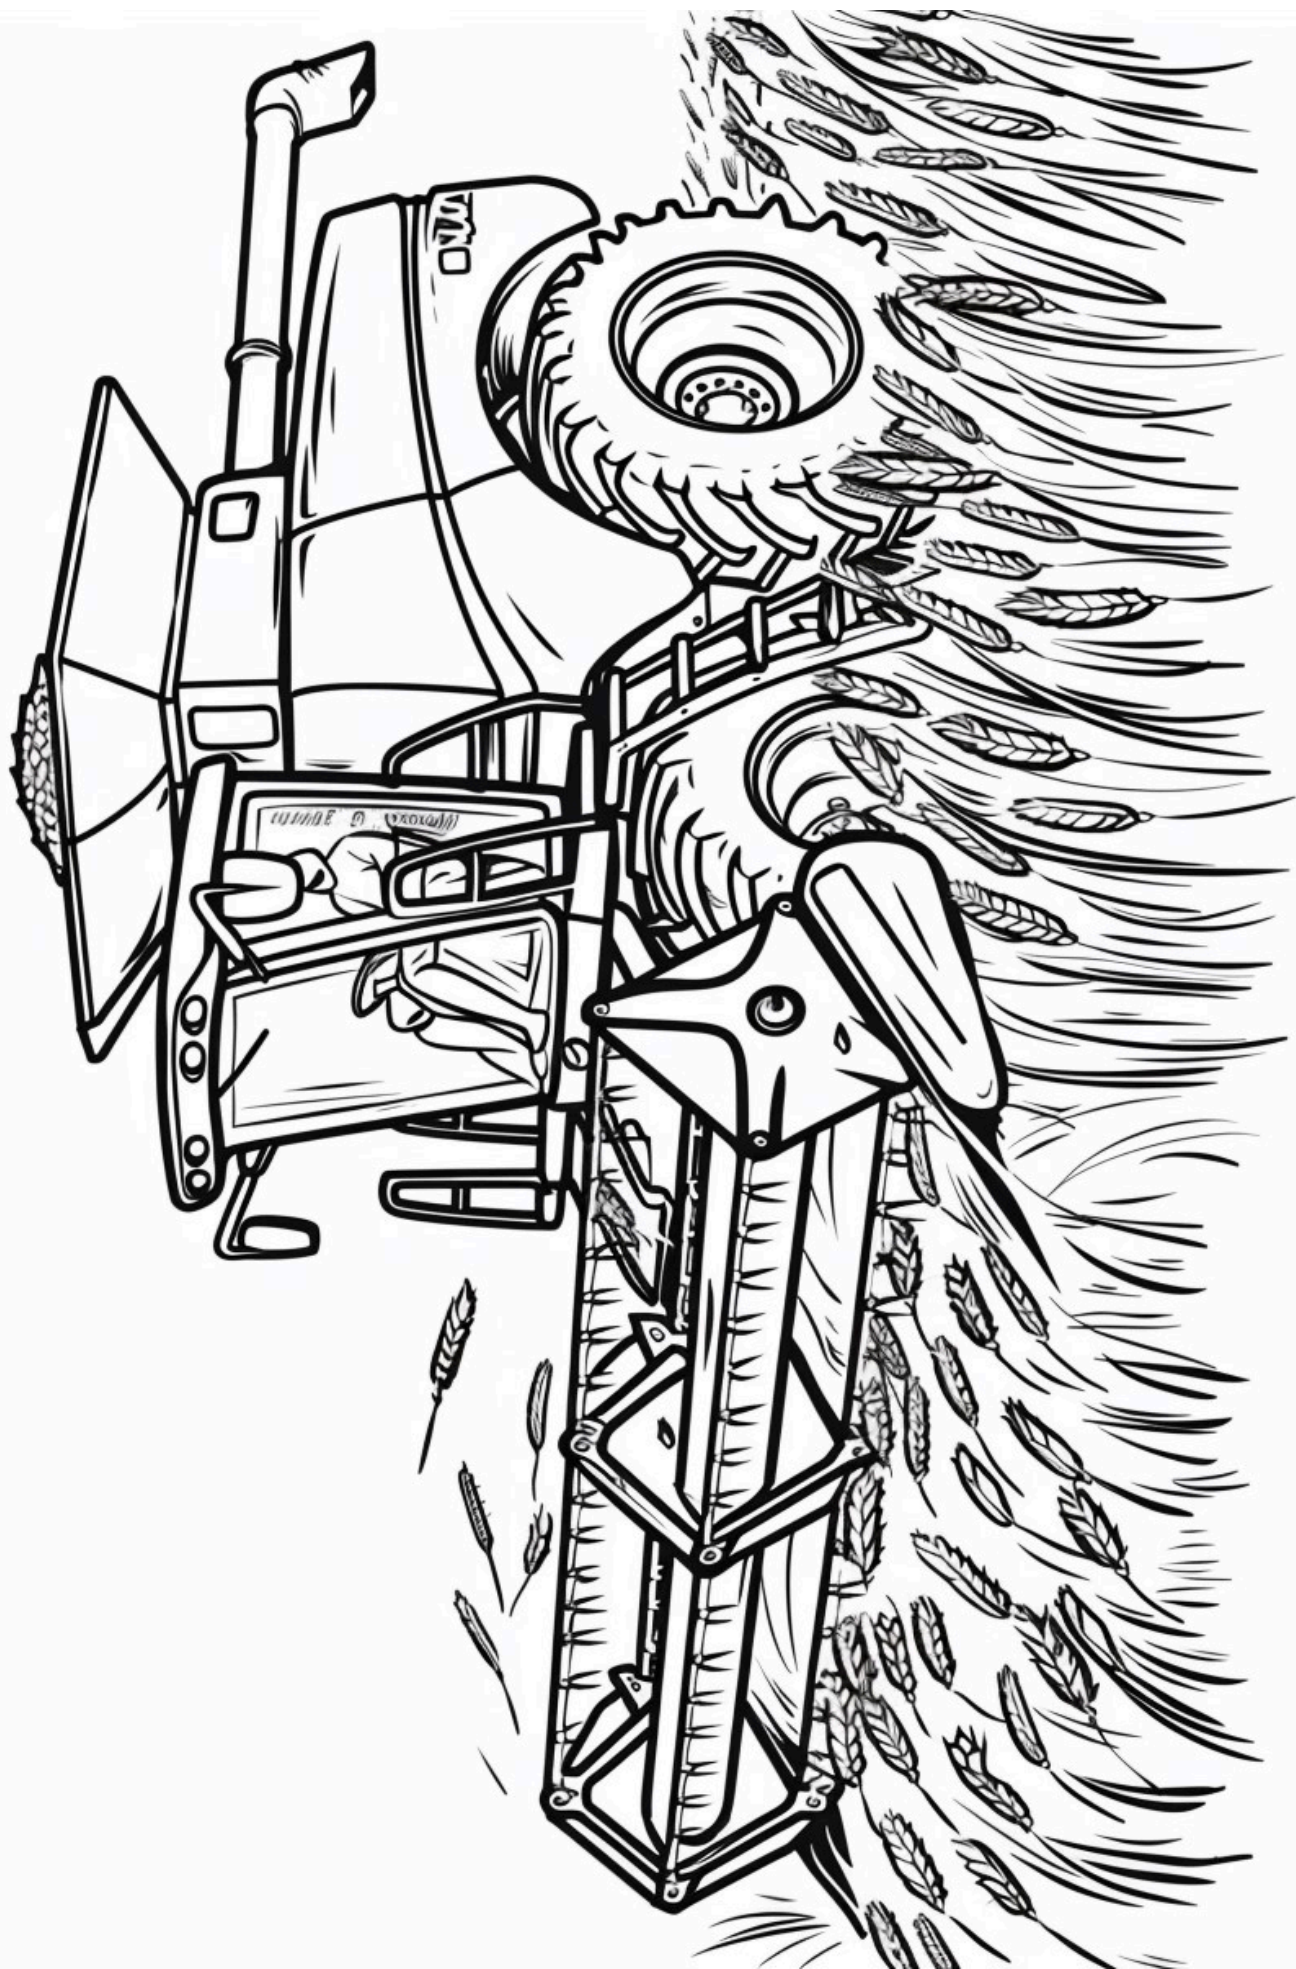

Hand out 4-6 saltines and place a dollop of peanut butter and jam on their plates to have students make their own mini “pb&j” sandwiches! Explain to kids that saltines are another product made from Kansas wheat! Flour, which is made from wheat, is the main ingredient in saltine crackers.

EXTENSION ACTIVITIES

- The Journey of Wheat Video:
