Cheese Taste-Testing & Data Collection Activity

1. Sample the Cheese

- Allow students to try each type of cheese.
- Encourage them to notice the textures, smells, and tastes of each one.

2. Choose a Favorite

- Students vote on their favorite cheese. Voting options could include:
  - Tally marks under each cheese name on the whiteboard.
  - Sharing out loud which cheese they liked best and one reason (texture, taste, smell, etc.).
  - Raising hands while the teacher counts and records results.

3. Record the Data

- As votes are collected, students will help transfer the results into a bar graph.
  - This could be done as you go or after the final numbers are in.

4. Analyze the Results

- Discuss questions such as:
  - Which type of cheese was the class favorite?
  - Which was the least favorite?
  - Were you surprised by the results?
  - How many people agreed with your favorite?
  - How does the bar graph make the results easier to see than just looking at the tallies or list?
